

## BIOCID TP® 2 SWP (Swimming pools, Spas and Resorts)

Water

Bactericidal

Fungicidal

Levuricidal

Viricidal

Eliminates the  
Coronavirus

Suitable for drinking  
water

Harmless to skin, eyes  
and oral mucosa in  
adequate doses and  
time periods

In compliance with the following standards:  
EN 13.697; EN 1276; EN 1650; EN 14.476;  
EN 12671; UNE EN ISO 10.993-10 2013.

Biocide based on a liquid solution of pure and stable Dioxygen Chloride. **BIOCID TP® 2 SWP** is authorised for the disinfection and sanitation of water in swimming pools, spas, aquariums and other bathing water for public or private use.

Efficacy certified by ENAC-accredited laboratories.

### PRINCIPAL FEATURES

- No microbiological resistance to all types of pathogens.
- Prevention and elimination of biofilm and biofouling.
- Does not create waste or by-products.
- No safety period.
- Does not transmit odour or flavour to products which come into contact with the usage dose.
- There are no corrosive or negative effects following usage doses.

### APPLICATION METHODS

It can be applied by direct injection into the water, by spraying, using a dosing pump or in any other way able to guarantee contact with the surfaces to be disinfected.

Do not apply in the presence of bathers.

Chemical treatments should not be applied directly to containers unless there is a justified reason.

Water must be circulated through the different units subjected to a treatment process before passing to the container.

### Disinfection of swimming pool.

BIOCID TP® 2 SWP removes all existing biofilm and biofouling in pipes, filters, overflows, etc., guaranteeing 100% disinfection of the entire system. BIOCID TP® 2 SWP can be applied using different treatments:

- A) Shock treatment
- B) For cleaning at the beginning and end of the bathing season
- C) Continuous

The form of application depends on the use and the problems that may arise in the systems to be treated.
