

## CLODOS PURO® (Drinking water, osmosis and membranes)

Water

Livestock  
and veterinary

Bactericidal

Fungicidal

Levuricidal

Viricidal

Eliminates the  
Coronavirus

Suitable for drinking  
water

Harmless to skin, eyes  
and oral mucosa in  
adequate doses and  
time periods

In compliance with the following standards:  
EN 13.697; EN 1276; EN 1650; EN 14.476;  
EN 12671; UNE EN ISO 10.993-10 2013.

**Biocide based on a liquid solution of pure and stable Dioxygen Chloride. CLODOS PURO® is authorised for the disinfection of Water for Human and Animal Consumption.**

Efficacy certified by ENAC-accredited laboratories.

The effectiveness of CLODOS PURO® does not depend on the pH value of the medium, as it is extremely effective between pH 4 and 10, requiring neither correction nor balancing.

### PRINCIPAL FEATURES

- No microbiological resistance to bacteria, viruses, fungi, larvae, spores and algae.
- Prevention and elimination of biofilm and biofouling.
- Does not create waste or by-products.
- No safety period.
- Does not transmit odour or flavour to products coming into contact with usage doses.
- There are no corrosive or negative effects following usage doses.

### APPLICATION METHODS

**CLODOS PURO® can be applied by direct injection, dosing pump or any other technique able to guarantee the correct disinfection of the water to be treated.**

#### Treatment of Water for Human and Animal Consumption.

Apply continuously by direct injection, maintaining a residual amount at the plant outlet.

The indications given in the German regulations regarding the treatment of O<sub>2</sub>Cl in water for human and animal consumption must be followed at all times.
